APM TERMINALS Lifting Global Trade℠

To whom it may concern

Re: Letter of Recommendation: Tingelo Enterprises (Pty) Ltd

Please note that Tino Gheza of Tingelo Enterprises was appointed 5 years ago to service, repair and maintain our old fleet of problematic Thermoking underslung gensets.

The reason for this was that we haven't received the required quality of service from the TK Agent. Tino and his Team did an excellent job and we used the gensets another 3 years which was already over their planned life span.

Through Tingelo, we acquired another 18 new SA Reefer underslung gensets which he still maintains with the absolute minimal problems.

From the beginning of 2019, Tingelo was also asked to assist on a short-term contract to get our trailer fleet up to standard. The contract was ended at the end of December 2020 due to a national supplier with a bigger footprint that was appointed. During this time Tino and his Team attended to all the maintenance, repair and breakdowns all over KZN. We never received traffic fines for any unroadworthy trailers.

It was a pleasure dealing with Tino and his Team and they are still doing the maintenance and repair contract for all gensets of APMT Durban. We rely heavily on good quality equipment as we do big volume COT reefer export shipments and from experience, we know that Tingelo is part of our success.

Please contact me for any additional information.
